The JDMLF, Inc. is an all-volunteer 501(c)3 organization dedicated to public awareness and prevention education of Lyme Disease and other tick borne illnesses. Tax ID # 20-3916450.

Dear Friends and Supporters,

Over the last twenty years, Lyme Disease has become the most frequently reported vector-borne illness in the U.S. In New Jersey, total Lyme cases reported by the Center for Disease Control (CDC) from 1990 to 2006 were 32,769. In 2007, 3,134 cases were reported, a 29% increase over 2006. The CDC has stated Lyme Disease is under reported with the total number of cases being tenfold higher. Lyme and other tick borne illnesses continue to be a major health concern in New Jersey.

The "John Fund" thanks it's many supporters for the success of it's last four Great Imitator Fundraisers and is proud to announce that the research grant on the Lone Star Tick (*Amblyomma americanum*) and the threat this tick and it's diseases pose to the public, funded in 2008, has been completed and will be published in the near future. We will be able to fund further prevention research grants due to your generosity.

We are holding the 5th Great Imitator Fundraiser at Jenkinson's Pavilion in Point Pleasant Beach, NJ on Sunday, November 7, 2010 to unite Lyme Disease sufferers, their families and other interested parties. Please join us that day. We are asking professionals, businesses and individuals to assist us in our programs by taking out an ad in our event ad journal and/or by purchasing a ticket to the fundraiser. No amount is too small to assist us in our awareness and prevention education programs to help prevent more victims of Lyme and other tick borne illnesses. The proceeds from this fundraiser will be used for awareness, prevention, and educational materials in spreading the word about these devastating diseases, and for further funding of grants in prevention research.

Sincerely,

Emilia Eiras, President , JDMLF, Inc.
